DATA SCIENCE AND AI PASSIONATE

Hands-on experience in Python, machine learning, and deep learning. Strong academic foundation comprising a Master of Science in Computer Science with a specialization in Data Science and a Bachelor of Science in Physics. Demonstrated strong project management and data science skills through successful internships. Experienced in developing Generative AI projects using various AI tools across multiple academic and internship-based projects. Committed to continuous learning and contributing to impactful, real-world solutions.

EDUCATION

MSc in Computer Science with Specialization in Data Science 2023–2025

Cochin University of Science and Technology, Ernakulam, Kerala
GPA: 8.83 (First Semester) | GPA: 8.75 (Second Semester)
GPA: 8.43 (Third Semester) | GPA: 8 (Fourth Semester)

BSc in Physics with Computer Science and Mathematics 2020–2023

University of Calicut, PTM Govt. College, Perinthalmanna, Kerala
CGPA: 7.625/10

Higher Secondary 2018–2020

GHSS Mankada, Malappuram, Kerala State Board
93.33%

SSLC 2018

TSS Vadakkangara, Malappuram, Kerala State Board
100%

EXPERIENCE

SOFTWARE DEVELOPER INTERN December 2024 – April 2025

Zerone Consulting | Kochi, Kerala

- Implemented an AI-powered invoice processing system using a Large Language Model in Python.
- Explored AI applications in music generation.
- Rapidly learned and applied new technologies and methodologies in Gen AI.

DATA ANALYTICS SUMMER INTERNSHIP June 2024 – August 2024

IBM SkillsBuild | CSRBOX Foundation

- Hands-on experience in data analytics and interpretation of datasets.
- Collaborated on projects using data tools to derive actionable insights.

PROJECTS

Invoice Processing using LLM

Developed an intelligent system that extracts structured data from invoices using Large Language Models (LLMs) and enables smart querying through a user-friendly interface.

Music Generation using AI

Built an RNN-based multi-instrument music generator that creates compositions based on user-defined length and tempo.

Medical Chatbot

Implemented a chatbot using NLP and RAG, leveraging medical encyclopedias to provide accurate responses to health-related queries.

Sports Chatbot

Built a conversational AI chatbot using RAG and sports encyclopedias to handle user queries across the sports domain.

Interview Genie: An Intelligent System for Targeted Interview Training

Created an AI-driven platform that generates personalized interview questions based on job descriptions to enhance user preparation.

Analyzing Crop Production Trends for Enhanced Agricultural Efficiency

Performed data analysis on crop production in Kerala to identify trends, productivity gaps, and propose sustainable agricultural strategies.

Stock Sense

Built a machine learning model using Python and Scikit-learn to predict stock market trends based on historical data.

Study of CE Configuration and Amplifier

Conducted experiments on Common Emitter amplifier circuits to analyze gain, frequency response, and amplification characteristics.

SKILLS

- Experienced in multiple programming languages including Python, C, and R.
 - Database management: MySQL and MongoDB
 - Experienced with development frameworks and tools such as Streamlit, Flask, HTML, and CSS
 - Technical Skills: Machine Learning, Deep Learning, MySQL, Full-Stack Development
 - Innovative problem-solving
 - Experience with AI technologies, including Large Language Models (LLMs), LLaMA, LangChain, and LlamaIndex
-

CERTIFICATIONS

- IBM SkillsBuild Data Analytics Summer Internship
- CSRBOX: Data Analytics Internship Plan
- Placement Assistance Program
