

RAJALAKSHMY N V

PROFILE

MCA student with expertise in Python, Java, C, SQL, HTML, CSS, and JavaScript, passionate about developing innovative and efficient applications. Skilled in web development, database management, and solving complex programming challenges. Strong in collaboration, communication, and attention to detail, with the ability to quickly adapt to new technologies. Committed to delivering high-quality solutions and contributing to dynamic, challenging projects with a proactive and improvement-driven mindset.

EDUCATION

2023-2025

COCHIN UNIVERSITY OF SCIENCE AND TECHNOLOGY

- ✦ Master of computer applications
- ✦ GPA :9.27

2018-2021

CALICUT UNIVERSITY

COLLEGE OF APPLIED SCIENCES, IHRD CALICUT

- ✦ Bachelor of Science Computer Science
- ✦ GPA: 4.45/6

2017-2018

ZAMORIN'S HIGHER SECONDARY SCHOOL CALICUT

- ✦ Higher Secondary Education
- ✦ Percentage:88

2015-2016

ZAMORIN'S HIGHER SECONDARY SCHOOL CALICUT

- ✦ Secondary school leaving certificate
- ✦ Percentage:98

WORK EXPERIENCE

2024.12-2025.04

Origin Impact

Software engineer intern

2021.08-2022.09

Tata Consultancy Services

Graduate Trainee

TECHNICAL SKILLS

- ❖ Programming Languages :
Python , C, Java
- ❖ Browsing Languages : HTML &
CSS
- ❖ Database : MY SQL, MongoDB
- ❖ AI tool: Machine learning,
Deep Learning
- ❖ Operating Systems : Windows,
Linux
- ❖ Scripting Languages :
JavaScript

SOFT SKILLS

- ❖ Decision making
- ❖ Leadership
- ❖ Teamwork
- ❖ Communication
- ❖ Time Management
- ❖ Problem Solving
- ❖ Critical Thinking

LANGUAGES

- ❖ English
- ❖ Malayalam
- ❖ Hindi
- ❖ Tamil

HOBBIES

- ❖ Reading
- ❖ Travelling
- ❖ Listening Music
- ❖ Singing

ACADEMIC PROJECTS

❖ Theft n wall and antitheft

Developed a mobile application using Python, Android Studio, and Flask to enhance security and usability. Features include app-specific internet control, spam message filtering, child lock for restricted usage, and theft detection with SIM change alerts and remote locking.

Technical stack: Python, Android studio, Flask

❖ Clinical diagnosis and prediction system for autism

Developed an advanced diagnostic system utilizing MRI brain image analysis to improve the accuracy and efficiency of Autism Spectrum Disorder (ASD) diagnosis. Applied preprocessing techniques (e.g., reorientation, motion correction, skull stripping) and implemented neural networks like VGG16 and EfficientNet for reliable predictions. The system enhances diagnostic precision, accelerates early detection, and supports clinicians in making data-driven decisions for effective ASD management.

Technical stack: React JS, Deep Learning

❖ Social media management system

Developed a unified platform to manage and automate content across multiple social media accounts using AI-driven content generation, smart scheduling, and engagement optimization. The application features a centralized dashboard with analytics, multi-platform support, and a user-friendly interface for customizing AI-generated content. Security was ensured through robust authentication, encryption, and compliance with data protection standards.

Technical stack: React, Node.js, Python, Flask, NLP, ML

CERTIFICATES

- ❖ NPTEL certificate on internet of things
- ❖ IBM artificial intelligence certificate
- ❖ IBM Getting started with Artificial intelligence certificate
- ❖ HackerRank Java Basic Certificate
- ❖ HackerRank SQL Basic Certificate
- ❖ HackerRank SQL Intermediate Certificate
- ❖ Techplemt virtual internship certificate
- ❖ IBM CSRBBOX virtual internship certificate

AWARDS AND ACHIEVEMENTS

- ❖ Rajyapuraskar award in Guides and Scouts
