EXECUTIVE SUMMARY

Results-driven Cloud Architect & DevOps Lead with 7+ years of experience managing multi-region AWS cloud infrastructure, Kubernetes clusters, Terraform infrastructure-as-code, and automated Python script deployment pipelines.

TECHNICAL CAPABILITIES

Core Competencies: AWS, Kubernetes, Docker, Terraform, Ansible, Python, Bash, CI/CD, Jenkins, Prometheus, Grafana, Linux Administration

EMPLOYMENT HISTORY

- Lead DevOps Engineer | CloudSphere Inc.

Oct 2021 - Present (Seattle, WA)

 - Managed multi-cluster Kubernetes deployments on AWS EKS serving 10M+ daily active users.
 - Implemented Terraform modules for IaC, reducing environment provisioning time from days to 15 minutes.
 - Built Python automation tools for automated security compliance scanning and cost optimization.
- Senior Systems Engineer | Infrastructure Solutions

Jul 2017 - Sep 2021 (Bellevue, WA)

 - Configured Jenkins CI/CD pipelines for automated testing, artifact creation, and zero-downtime deployment.
 - Monitored system health and uptime using Prometheus and Grafana dashboards.

EDUCATION BACKGROUND

- Master of Science in Computer Science - University of Washington

2015 - 2017
- Bachelor of Technology in Information Technology - IIT Delhi

2011 - 2015
