

Alex Chen

Senior Python Developer & AI Engineer

alex.chen@email.com • (555) 234-5678 • San Francisco, CA • github.com/alexchen-dev

PROFESSIONAL OVERVIEW

Passionate Senior Software Engineer with 5.5 years of experience architecting scalable backend systems, microservices, and AI-powered data pipelines using Python, FastAPI, and PyTorch. Proven track record of improving API performance by 40% and deploying cloud solutions on AWS.

TECHNICAL SKILLS & TOOLS

Core Competencies: Python, FastAPI, Django, PyTorch, PostgreSQL, Redis, Docker, Kubernetes, AWS, Git, CI/CD, REST APIs, Microservices

PROFESSIONAL EXPERIENCE

Senior Software Engineer | TechScale Solutions

Mar 2022 - Present (San Francisco, CA)

- Architected high-throughput Python FastAPI microservices serving over 2M daily API requests.
- Integrated PyTorch machine learning models into production inference pipelines, cutting latency by 35%.
- Led migration of legacy monolith to Docker containers and Kubernetes on AWS EKS.

Python Developer | DataFlow Innovations

Jun 2019 - Feb 2022 (San Jose, CA)

- Developed backend RESTful services using Python, Django, and PostgreSQL for real-time data analytics.
- Optimized database SQL queries and implemented Redis caching, reducing page load times by 50%.
- Collaborated with cross-functional Agile engineering teams to deliver bi-weekly product releases.

EDUCATION

B.S. in Computer Science - Stanford University

2015 - 2019
